## SUMMARY

Unnikrishnan KP believes that engineering is the art of solving problems while working with real world constraints and limited available resources.

He has been a full-stack web developer for 8 years, and understand all aspects of modern web development. He has executed numerous web development projects in all stages of the product development cycle (with Ruby on Rails and related technologies).

He has the ability to take up large and complex software projects, plan and execute them, following agile methodologies, while leading a team from the front.

- Gets stuff done.
- Nimble.
- Thrives on taking on challenges and responsibility.
- Enjoys leading teams.
- Thinks deeply about problems and enjoys the process of building a creative solution.
- Can cut through a problem and get to the heart of an issue quickly.
- Understands the value in writing clean code, testing and automation.
- Self-starter with a willingness to learn new things.
- Works at high pace with a sense of urgency without compromising code quality.
- Effective communication skills.
- Loves working remote.

## SKILLS

- |                             |                          |
|-----------------------------|--------------------------|
| • Ruby                      | • Ruby on Rails          |
| • JavaScript                | • DevOps                 |
| • Amazon Web Services (AWS) | • Linux                  |
| • Team Leadership           | • Web Applications       |
| • MySQL                     | • Git                    |
| • Communication             | • Web Development        |
| • Test Driven Development   | • Object Oriented Design |
| • Agile Methodologies       | • Web Services           |

## EXPERIENCE

### Bang the Table

02 / 2012 - Present

Engineering Lead

Responsibilities:

- Collaborating and working with business stake holders, clients, service providers and the development team.
- Architecture decisions for the EngagementHQ, BudgetAllocator platforms and PeacekeeperHQ.
- Mentoring the developers and building the team.
- Hands on coding for developing mission critical parts of the application.
- Managing the servers and other infrastructure for running the production environment in different geographies, and staging environments, and continuous integration servers.
- Monitoring and ensuring security and performance of the platform.
- Running the platform team, mentoring and overseeing the feature development teams.
- Building internal software systems.

**Bang the Table** 2008 - 2012  
Software Architect

- Designed, architected and built V1 of the EngagementHQ platform single handedly.
- Handled feature development, handling production bugs/issues raised by clients, and all the devops needed.
- As the team grew gradually, assumed the role of the team lead.
- Lead the team to build V2 of the EngagementHQ and BudgetAllocator platforms.

**Cleartrip.com** 2008 - 2008  
Senior Software Developer

**Allerin Tech Pvt Ltd** 2008 - 2008  
Senior Web Application Developer

Worked on multiple projects for different clients, building web applications using Ruby on Rails.

**Viamentis Technologies** 2007 - 2008  
Software Developer

<http://www.viamentis.com>

Worked on multiple projects for different clients, building web applications using Ruby on Rails.

**Market Simplified India Ltd** 2006 - 2007  
System Analyst

Worked on their flagship product MarketSimplified.com.  
Languages: Ruby, C

**EDUCATION** **Govt Engineering College Thrissur** 2002 - 2006  
Bachelor of Technology (B.Tech.) , Computer Science

**Chinmaya Vidyalaya, Kannur** 2000 - 2002

**St.Michaels Anglo Indian High School, Kannur, Kerala** 1990 - 2000

**INTERESTS** Music & Lyrics, Writing, Travelling, long road trips, long rides on my Royal Enfield bike

**LANGUAGES**
